Q Write a paragraph on this topic

## "My School"

Do mention the following points.

1. History of school
2. Building
3. Play grounds
4. Laboratories
5. Libraries
6. Assembly areas
7. Different blocks
8. Tuck shop
9. Cafeteria
10.Flowering beds
11.Houses ( Iqbal, Liaqat, Byrne, Jinnah)
10. Different activities of school

## Comprehension

The bicycle wasn't exactly big enough for either of them. Yousaf, perched on the carrier, had to keep his feet up off the road, and Talib couldn't sit on the saddle properly. Still, it was better than walking.
They went along shady patches of road where the rubber trees met overhead and stretched out in orderly rows on either side, like naves of great cathedrals; they passed pineapple plantations, and coconut plantations; and sometimes the view opened up to show them a stretch of white sand, palm trees, a small brown Kampong, and the sea. And then it was very hot and the sun seemed to dry up the road around them.
In Kuala Besar it was even more difficult riding. Kuala Besar is a small town with narrow, crowded streets. Talib had quite a job steering his way among pedestrians and traffic, and inevitably, at the traffic lights Yousaf fell off.
The market in Kuala Besar smells of fish, which is the main commodity sold there. Until the long, corrugated iron roof of the shed, meat, vegetables, fruits, crockery, cheap clothes, woven mats and baskets and even betel leaf are offered for sale, but only the fish makes its presence felt throughout the market shed Yousaf bought what he had come for, and added a bunch of rebuttals, Malay fruit with a spiky red skin and a white soft centre, so that they could refresh themselves all the journey home. They fastened everything on to the bicycle and then wondered about the town looking at the shops. It was often they had such treat as a visit to the town, and they made the most of it. And since yousaf had saved on the bus fare, they both had a Pepsi cola at a coffee shop.
Altogether it was quite late in the day when they started back to Kampong Laut.

Assessment 3

Marks (15)
Read the given comprehension and answer the following question:

Q1 Which of the boys did the cycling?
$\qquad$
$\qquad$
$\qquad$

Q2 When do you think the boys set out for Kuala Besar?
$\qquad$
$\qquad$
$\qquad$

Q3 What kind of plantations did the boys see on the boys?
$\qquad$
$\qquad$
$\qquad$
Q4 Why was it difficult cycling in Kuala Besar?
$\qquad$
$\qquad$
$\qquad$
Q5 why do you think the boys regarded a visit to the town a treat.
$\qquad$
$\qquad$
$\qquad$

Q1: Fill in the empty boxes in the table.

| Type of cell | Drawing of cell | Job or function of cell |
| :--- | :--- | :--- |
| Leaf palisade cell | where most photosynthesis <br> occurs |  |
| Root hair cell |  |  |
| Red blood cell |  |  |
| Nerve cell |  |  |

## ST. MARY'S ACADEXY <br> CLASS ${ }^{\text {th }}$

Q2: Complete the passage below using words from the list below.

| Specialized | Chloroplasts | Nucleus | Cells | Photosynthesis | Cellulose |
| ---: | :---: | :---: | :---: | :---: | :---: |
| Cell membrane | Cell wall | Cell |  |  |  |

All organisms are made up of units called $\qquad$ . These units are surrounded by a $\qquad$ that controls what enters and leaves the
$\qquad$ . The $\qquad$ controls all the activities of the cell. Plant cells differ from animal cells in that they have a made of $\qquad$ . Many plant cells also contain tiny organelles called $\qquad$ that make food for the plant by $\qquad$ .
Most cells are $\qquad$ for the job they do.

Q1: Define Photosynthesis.
$\qquad$
$\qquad$
$\qquad$

Q2: Write down the word equation for photosynthesis.

Q3: Define Respiration.

## 

## ST. MARY'S ACADEXY <br> CLASS ${ }^{\text {th }}$

Q4: Circle the correct answer.

1. The raw materials for photosynthesis are:
(A) Nitrogen and water
(B) Nitrogen and carbon dioxide
(C) Carbon dioxide and water
(D) Carbon dioxide and oxygen
2. The products of photosynthesis are:
(A) Carbon dioxide and oxygen
(B) Carbon dioxide and glucose
(C) Glucose and oxygen
(D) Starch and carbon dioxide
3. The energy for carrying out photosynthesis is obtained from:
(A) Chlorophyll
(B) Oxygen
(C) Sunlight
(D) Carbon dioxide
4. Many plants change the glucose produced during photosynthesis into:
(A) Starch
(B) Carbon dioxide
(C) Fats
(D) Mineral salts
5. A leaf is tested for the presence of starch. When is most starch likely to be present?
(A) After rain
(B) first thing in the morning
(C) After several hours of darkness
(D) after a long sunny day
