### Week No. 6

# Day - I

 $\overset{\frown}{\sim}$ 

(Note: Read thrice, understand and rewrite the following questions)

Q1. What is the saying of the Holy Prophet (PBUH) about brotherhood? Ans.

About brotherhood, the Holy Prophet (S.A.W) said; "Each Muslim is a brother to every other Muslim. He should not commit breach of trust. He taught to refrain from maliciousness, malignance and enviousness."

#### Q 2. What is meant by Two-Nation Theory in the historical perspective of the Sub-continent? Ans.

In the perspective of the Sub-continent, Two-Nation Theory means that two major nations, the Muslims and the Hindus, were settled there. The two nations were entirely different from each other in their religious ideas, the way of living and collective thinking. Their basic principles and the way of living are so different that despite living together for centuries, they could not intermingle with each other.

# Q 3. What did Allama Igbal mention in his famous Allahabad address? Ans.

In his Allahabad address Allama Muhammad Igbal said: "The formation of a consolidated North-West Indian Muslims state appears to me to be the final destiny of the Muslims, at least of North-West India. The life of Islam as cultural force in this living country very largely depends on its centralization in a specific territory. I, therefore, demand the formation of a consolidated Muslim state in the best interest of India and Islam."

### Day – II

(Note: Read thrice, understand and rewrite the following questions)

### CLASS 8

Q1. Why the implementation of Islamic System is necessary in an Islamic societv?

### Ans.

Islam is not merely the set of rituals and worships, but it is a complete code of life. It has the ability to fulfill all the demands of human life. It can fulfill all the economical, moral and political purposes of the society. Islamic system is in perfect harmony with modem demands and is completely practicable for every age.

### Q 2. What did Quaid-e-Azam say about nationalism?

### Ans.

About nationalism, Quaid-e-Azam said:

"Musalmans are a nation according to any definition of a nation, and they must have their homeland, their territory and their state."

### Day - III

(Note: Read thrice, understand and rewrite the following questions)

### Q 1. What did Quaid-e-Azam say about the security of minorities? Ans.

Sense to provide security to the minorities was also included in the background of the demand for Pakistan. Quaid-e-Azam (R.A) said very clearly that the right of the minorities will be fully protected in Pakistan. Islam does not allow that life, property, dignity and religious traditions of the minorities in Pakistan go unprotected.

Q2. What did Quaid-e-Azam say while addressing to the people of Dhaka on March 21. 1948?

Ans.

On 21<sup>st</sup> March, 1948, Quaid-e-Azam addressed the people of Dhaka. He said, "What we

# Day - IV

 $\bigstar$ 

 $\bigstar$ 

 $\bigstar$ 

 $\bigstar$ 

 $\bigstar$ 

 $\bigstar$ 

(Note: Read thrice, understand and rewrite the following questions)

# Q1. Why did the Muslims of the sub- continent got freedom? Ans.

The Muslims of the Sub-continent got a separate homeland so that they might give practical shape to the final and absolute authority of Almighty Allah. The-people might implement the absolute power of the Almighty Allah and such a system might be practiced as based upon the principles of the Holy Qura'an and the teachings of the Holy Prophet (PBUH).

# Q2. Explaining the Ideology of Pakistan, what did Quaid-e-Azam say? Ans.

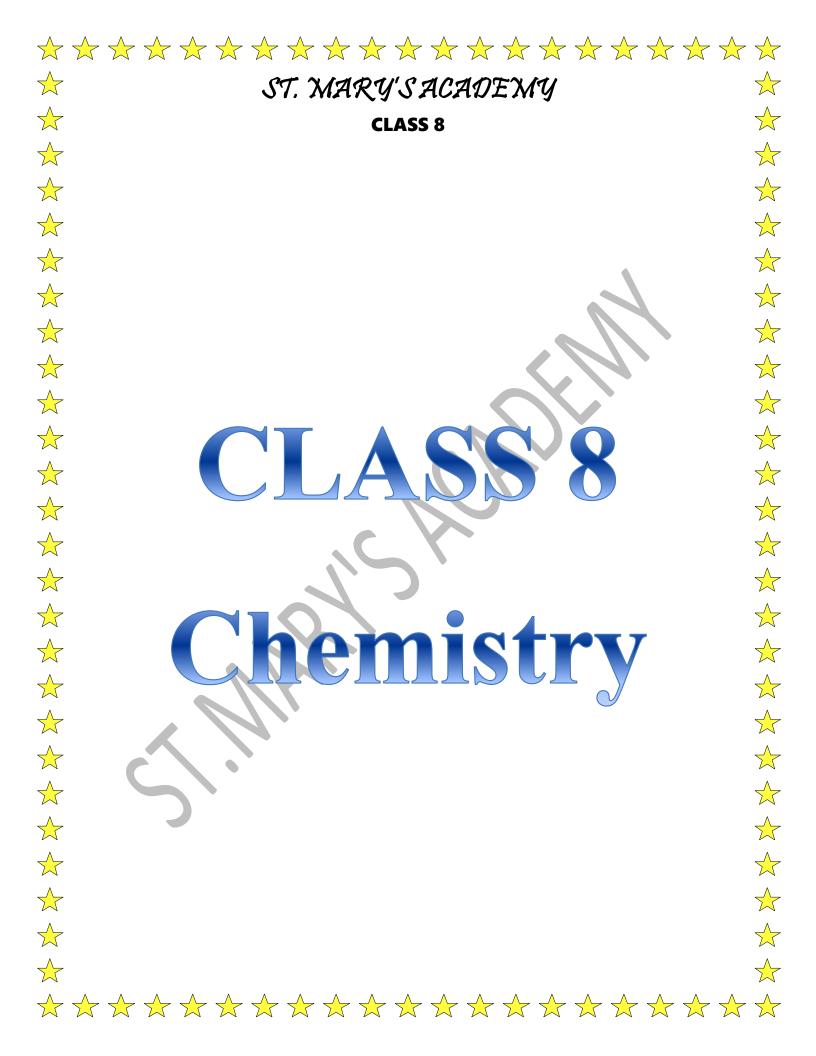

Explaining the Ideology of Pakistan Quaide-Azam said, "We do not demand Pakistan simply to have a piece of land but, we want a laboratory where we could experiment on Islamic principles."

# Q3. Write down the Basic Pillars of Islam in sequence. Ans.

The basic pillars of Islam are following:

1. Touheed and Prophethood	
4. Zakaat	

- 2. Namaaz 5. Hajj
- 3. Keeping fast

### Answer the following questions.

Q 1. Differentiate between Gram Atomic Mass, Gram Molecular Mass and Gram Formula Mass.

**CLASS 8** 

- Q 2. What is the concept of Mole? Calculate the number of moles in 2.4 g of He.
- Q 3. What mass of sodium metal contains the same number of atoms as 12.00g of Carbon?
- Q 1. Calculate the number of atoms in given moles.
- Zn is a silvery metal that is used to galvanize steel to prevent corrosion. How many atoms are there in 1.25 moles of Zn.
- Q 2. Calculate the number of molecules in given moles of a substance.
- Methane (CH4) is the major component of natural gas. How many molecules are present in 0.5 moles of a pure sample of methane?
- At high temperature hydrogen sulphide (H<sub>2</sub>S) gas given off by a volcano is oxidized by air to Sulphur dioxide (SO<sub>2</sub>). Sulphur dioxide reacts with water to form acid rain. How many molecules are there in 0.25 moles of SO2.

Week-5

Q.1) Put the verbs in the correct form of the present tense (simple present or continuous tense) Page No. 162/163 from Grammar Book.

Example: He (sing) a song.

Correct: He sings a song.

- 1) She (play) with her cat daily.
- 2) He (go) to school every day.
- 3) It (rain) at present
- 4) They drink tea every morning
- 5) Good children always work hard.
- 6) The earth (revolve) around the sun.

Q. 2) Put the verbs in the correct form of the Past or Past Continuous Tense. (PTB Grammar Page No. 164/165) (Remember to use second form of the verb) Example:- I went to Karachi in December.

v) I (visit) historical places of Lahore in 2018.

	CLASS 8
vi) 	I (go) to school in February.
vii)	The Quaid-e-Azam (work) very hard.
viii)	My brother shut the door softly.
x)	It (begin) to rain an hour ago.
<)	How long ago you (come) here.
ki)	She (not hear) any noise.
	He (ride) a bike when he (meet) an accident.
ciii)	He (leave) twenty minutes ago.

Q. 3) Read the topic, The Simple Past Tense from Page No. 165 of your English Grammar book and Put the verbs in the brackets in the correct form of the Past Simple or Past Continuous Tense.

Q. 4) After reading the examples from Page No. 167 or 168, remember five basic Rules to make Passive Voice:- (CONTINUATION OF VOICE)

Rule No. 1: Identify and circle the 'Subject' and 'Object' in the Active Voice Sentences.

- Rules No. 2: The Subject and Object are interchanged. (The Subject becomes Object and the **Object becomes Subject)**
- Rule No. 3: The helping verbs, 'is', 'am', 'are', 'was', were' are used with the 3<sup>rd</sup> form of the Verb according to the Present or Past Tense.

Rule No. 4: The Preposition 'by' is placed before the Object.

ST. MARY'S ACADEMY	
<b>CLASS 8</b> Rule No. 5: In Present or Past Continuous Tense, Use is being, are being, was being	or were
being according to the type of the tense. In Present Perfect Tense cha	
has/have into has been with the third form of the verb.	
Example: Active Voice: We have written an essay.	
Passive Voice: An essay has been written by us.	
Make the Passive Voice of the following Active Voice sentences:-	
Active Voice No. 1. She likes apples.	
Passive Voice:	
Active Voice No. 2 We did not hear a sound.	
Passive Voice:	
Active Voice No. 3. They have not bought a horse.	
Passive Voice:	
Active Voice No. 4. The board has given me a gold medal.	
Passive Voice:	
assive voice.	
Active Voice No. 5. He praised the boy for his courage.	
Passive Voice:	
Active Voice No. 6. The teacher was helping the student.	
Passive Voice:	
Active Voice NO. 7. Why were they beating the boy?	
Passive Voice:

NOTE FOR THE STUDENTS: Learn all the work given in the worksheet and practice daily. WEEK 5 Chap #1 Levels of Organization. **DAY 1:** 

### Answer the following questions.

- 1. Define organelle and cells.
- 2. What is division of labour?
- 3. What is cellular respiration?
- 4. Describe tissue. Name three Plant and Animal tissues.
- 5. Name the organs of Digestive system.

## **DAY 2:**

### Answer the following questions.

- 1. Why the organ system level is less complex in plants as compared to animals? Explain
- 2. How different organ and organ system performs the function of an individual? Explain with example.
- 3. Differentiate between population and community.
- 4. Give three examples of a complex community.
- 5. Write a note on cellular organization.

## **DAY 3:**

## Fill in the blank with appropriate words given in the vocabulary.

- 1. Scientific name of Mustard plant is .
- 2. Volvox is a green alga found in water that shows \_\_\_\_\_ organization.

# ST. MARY'S ACADEMY

## CLASS 8

- 3. Amoeba, Paramecium, and Euglena are common examples of organisms.
- 4. In multicellular organisms, similar cells performing similar functions are organized into groups, called
- 5. Biomolecules assemble in a particular way and form

Unicellular, Tissue, Brassica campestris, Organelles, Colonial

## **DAY 4:**

#### Encircle the correct option.

- 1. Which one will be the correct sequence of the levels of organization of life?
  - a. Cell, organelle, molecule, organ, tissue, organ system, individual
  - b. Molecule, tissue, organelle, cell, organ system, organ, individual
  - c. Molecule, organelle, cell, tissue, organ, organ system, individual
  - d. Organ system, organ, tissue, cell, molecule, organelle, individual
- 2. If a scientist is studying the methods of inserting human insulin gene in bacteria, which branch of biology may this be?
  - a. Anatomy b. Physiology Biotechnology d. Pharmacology
- 3. When we study the feeding relations among different animal species of a forest, at what level of organization we are studying?
  - a. Individual b. Population c. Community d. Biosphere
- 4. Which of these tissues also makes the glandular tissue in animals?
- b. Muscle tissue a. Epithelial tissue c. Connective tissue d. Nervous tissue 5. Which of these major bioelements is in the highest percentage in protoplasm?
- a. Carbon b. Hydrogen c. Oxygen d. Nitrogen

### Chapter # 2

SOLVING A BIOLOGICAL PROBLEM

WEEK: 6

## **DAY 1:**

Q 1. What is a Biological Method?

## CLASS 8

The scientific method, in which biological problems are solved, is termed as biological method. It comprises the steps a biologist adopts in order to solve a biological problem.

### Q 2. What is a biological problem?

Biological problem is a question related to life that is asked by someone or it comes in biologists mind.

### Q 3. What are the steps of Biological Method?

In solving a biological problem, biologist takes following steps;

- Recognition of biological problem
- Observations

 $\frac{1}{2}$

- Hypothesis formulation
- Deductions
- Experimentation
- Summarization of results (create tables, graphics etc)
- Reporting the results

## Q 4. Differentiate between Quantitative and Qualitative Observations. Also give examples. OR

Quantitative observations are always better then Qualitative ones. Why?

Observations may be both qualitative and quantitative.

### **Ouantitative Observation:**

Quantitative observations are considered more accurate than qualitative ones because they are invariable and measurable and can be recorded in terms of numbers. Examples are

- The freezing point of water 0°C and the boiling point is 100°C.
- A liter of water weighs 1000 grams and a liter of ethanol weighs 789 grams.

## **Qualitative observations**

- The freezing point of water is colder than the boiling point.
- A liter of water is heavier than a liter of ethanol.

## DAY 2:

Answer the following questions

## CLASS 8

#### Q 1. Define Hypothesis. What are the characteristics of a good Hypothesis?

#### **Definition:**

 $\mathbf{X}$ 

 $\bigstar$ 

 $\frac{1}{2}$ 

 $\frac{1}{2}$ 

 $\frac{1}{2}$ 

 $\checkmark$ 

 $\bigstar$ 

 $\checkmark$ 

The tentative explanation of observations is called a hypothesis. It may be defined as a proposition that might be true.

#### **Characteristics:**

A hypothesis should have the following characteristics:

- It should be a general statement.
- It should be a tentative idea.
- It should agree with available observations.
- It should be kept as simple as possible.
- It should be testable and potentially falsifiable. In other words, there should be a way to show the hypothesis is false; a way to disprove the hypothesis.

A great deal of careful and creative thinking is necessary for the formulation of a hypothesis. Biologists use reasoning to formulate a hypothesis.

#### Q 2. What are Deductions? Explain with example

Deductions are the logical consequences of hypotheses. For this purpose, a hypothesis is taken as true and expected results (deductions) are drawn from it.

Generally in biological method, if a particular hypothesis is true then one should expect (deduction) a certain result. This involves the use of "if-then" logic.

"If Plasmodium is the cause of Malaria then every person ill with malaria should have plasmodium in their blood".

## **DAY 3**: Answer the following questions

#### Q 1. Experimentation is the Basic step of a biological method. How?

The most basic step of biological method is experimentation. Biologist performs experiments to see if hypotheses are true or not. The deductions, which are drawn from hypotheses, are subjected to rigorous testing. Through experimentations, biologist learns which hypothesis is correct.

The incorrect hypotheses are rejected and the one which proves correct is accepted. An accepted hypothesis makes further predictions that provide an important way to further test its validity.

#### Q 2. What is the difference between "Control" group and "Experimental" group?

In science when doing the experiment, it must be a controlled experiment. The scientist must contrast an "experimental group" with a "control group". The two groups are treated exactly alike except for the one variable being tested.

**Control group:** Is the one in which all experimental conditions are provided.

**Experimental group:** A group in which all conditions are same as that of control group except one factor being tested or checked.

#### Example

In an experiment to test the necessity of carbon dioxide for photosynthesis, one can contrast the control group (a plant with freely available carbon dioxide) with an experimental group (a plant with no carbon dioxide available). The necessity of carbon dioxide will be proved when photosynthesis occurs in the control group and does not occur in the experimental group.

#### **DAY 4:**

#### Encircle the correct option.

- 1. Which one of the following is a correct sequence in biological method?
  - a. Observations, Hypothesis, Law, Theory
  - b. Hypothesis, Observations, Deduction, Experimentation
  - c. Observations, Hypothesis, Deduction, Experimentation
  - d. Law, Theory, Deduction, Observations
- 2. Which one of these is NOT a characteristic of a hypothesis?
  - a. Must be consistent with all available data
  - b. Must be testable
  - c. Must be correct
  - d. Must make predictions
- 3. At which point is a biologist most likely to use reasoning?
  - a. While taking observations b. During hypothesis formulation
  - c. During data organization d. None of the above
- 4. A hypothesis must be testable to be scientifically valid. Being testable means that
  - a. Some observation could prove the hypothesis incorrect
  - b. Only a controlled experiment can indicate whether the hypothesis is correct or incorrect
  - c. The hypothesis is proven wrong
